

Good news! Your Dejavoo terminal is pre-programmed and ready to roll! Here are a few tips to make sure all goes well when you run your first transaction:

1. Desktop terminals: Make sure you have the power cable plugged in (USB-C) and connected to either Ethernet or WIFI.
2. Mobile terminals: Connect to WIFI or verify you have 4G data connection at the top, if a SIM card was purchased with the unit
3. If you have a Dejavoo P1 or P3 terminal scan the code to watch this helpful video by our very own IT Specialist, Kenny Neou:

After your terminal is up and running, you'll want to log in to your iPOSpays and make sure you know how to use it. Check your email for login information for your iPOSpays gateway. If you don't have this information please call our office at 973-324-2251, or contact office@pcbancard.com.

From your iPOSpays Portal you can:

- send payment links
- view transactions, batches, and reports
- set up recurring payments
- generate tip reports
- learn how to use Dual Pricing
- learn how to Integrate your QuickBooks with iPOSpays
- and more

Find out how to do these things and more by watching the iPOSpays Training Video for Merchants on YouTube. Scan the code to go straight there:

If you would like to set up a call with our IT department for assistance with your terminal or how to use your iPOSpays Gateway, please book a meeting with our IT department here: calendly.com/kenny-pcb/15min

Thanks and enjoy!
